Summary

I am a detail-oriented and passionate Full Stack Developer with over 5.8 years of experience building responsive and scalable web applications. Specializing in modern JavaScript (ES6+), TypeScript, React.js, Redux, and RESTful APIs. Proven ability to transform UI/UX designs into high-quality, maintainable code in agile environments. Strong front-end expertise with frameworks like React.js and Next.js, along with hands-on experience in component libraries such as Material-UI, Mantine, and PrimeReact. Skilled in managing complex application state using Redux Toolkit. Complemented by back-end experience with Node.js and Python, enabling efficient full-stack development and integration. Adept at building REST APIs, handling asynchronous data flow, and delivering performant, user-centric applications.

Education

Kammavar Association College Of Arts And Science, Kamarajar University

BSc - Computer Science

Koduvilarpatty, Theni, Tamilnadu

Aug 2017

Experience

CRB INNOVATIVE SOLUTION

Web Designer

Chennai

May 2019 - Jun 2021

- At CRB Innovative Solution, I accurately develop the website using HTML, CSS, JavaScript, jQuery, and AJAX to bring their vision to life.

TRIPWERK

React Developer

Tamilnadu

Jun 2021 - Jun 2022

- I am creating Tripwerkz, a comprehensive hotel, flight, and tourist booking platform that serves both B2B and B2C markets. For the frontend development, I am using the Next.js framework combined with Material-UI for creating a modern, responsive user interface. Additionally, I am integrating APIs to ensure smooth functionality and real-time data processing across the entire booking system.

Foundever

Senior Developer

Chennai

Jun 2022

- Specialized in building AI-integrated applications tailored for chat and customer service platforms, improving customer engagement and operational efficiency. Built an intelligent system to analyze sentiment across key call phases (beginning, middle, and end), enabling comprehensive assessment of call quality and customer satisfaction. Designed and implemented automation workflows to streamline call center operations, significantly enhancing customer service across multiple industries. Architected robust backend service using Python, integrating seamlessly with AI and analytics modules. Utilized PostgreSQL for structured data storage, including call logs, sentiment scores, agent metrics, and customer feedback, ensuring efficient querying and scalability. Delivered scalable, modular solutions supporting rapid integration with existing CRM and support platforms.
